

DETECTIVE GUIDO Ludic's disk

Do you know where "Tochilovac" bar is? Great...
let's meet there around 10 .. bye..

Mr. Gvido, my husband, professor Ludic, is gone! It's
been five days already.. The police has nothing!

What did your husband do? Did
he have any enemies?

He did researches in the
field of quantum physics
and artificial intelligence...
he's been acting weird
lately..

How?

One day, while I was in the kitchen, through his working room door, I could hear a part of a phone call...

Yes.. close to the end.. CPC 464.. you'll all get a copy.. disc.. in Vincha, yes.. long live Akkorokamai!

Don't worry, I'll find your husband, just..

Thank you.

.. I mean, if not a problem.. the fee..

Sure. Here.

Thanks

It didn't take me long to trace Mr. Ludic. From what Dragana told me, I managed to find his abandoned laboratory in Vincha...

I found him sitting in a dark room, coding something on his old Amstrad CPC 464!

I didn't mean to surprise him, but that was exactly what happened.
I accidentally stepped on some cable on the floor..

I've been working on this project for past 5 years.

And it's finally complete!

It is a program for Amstrad CPC 464

where you can convert a human into qubits completely and upload it on a computer.

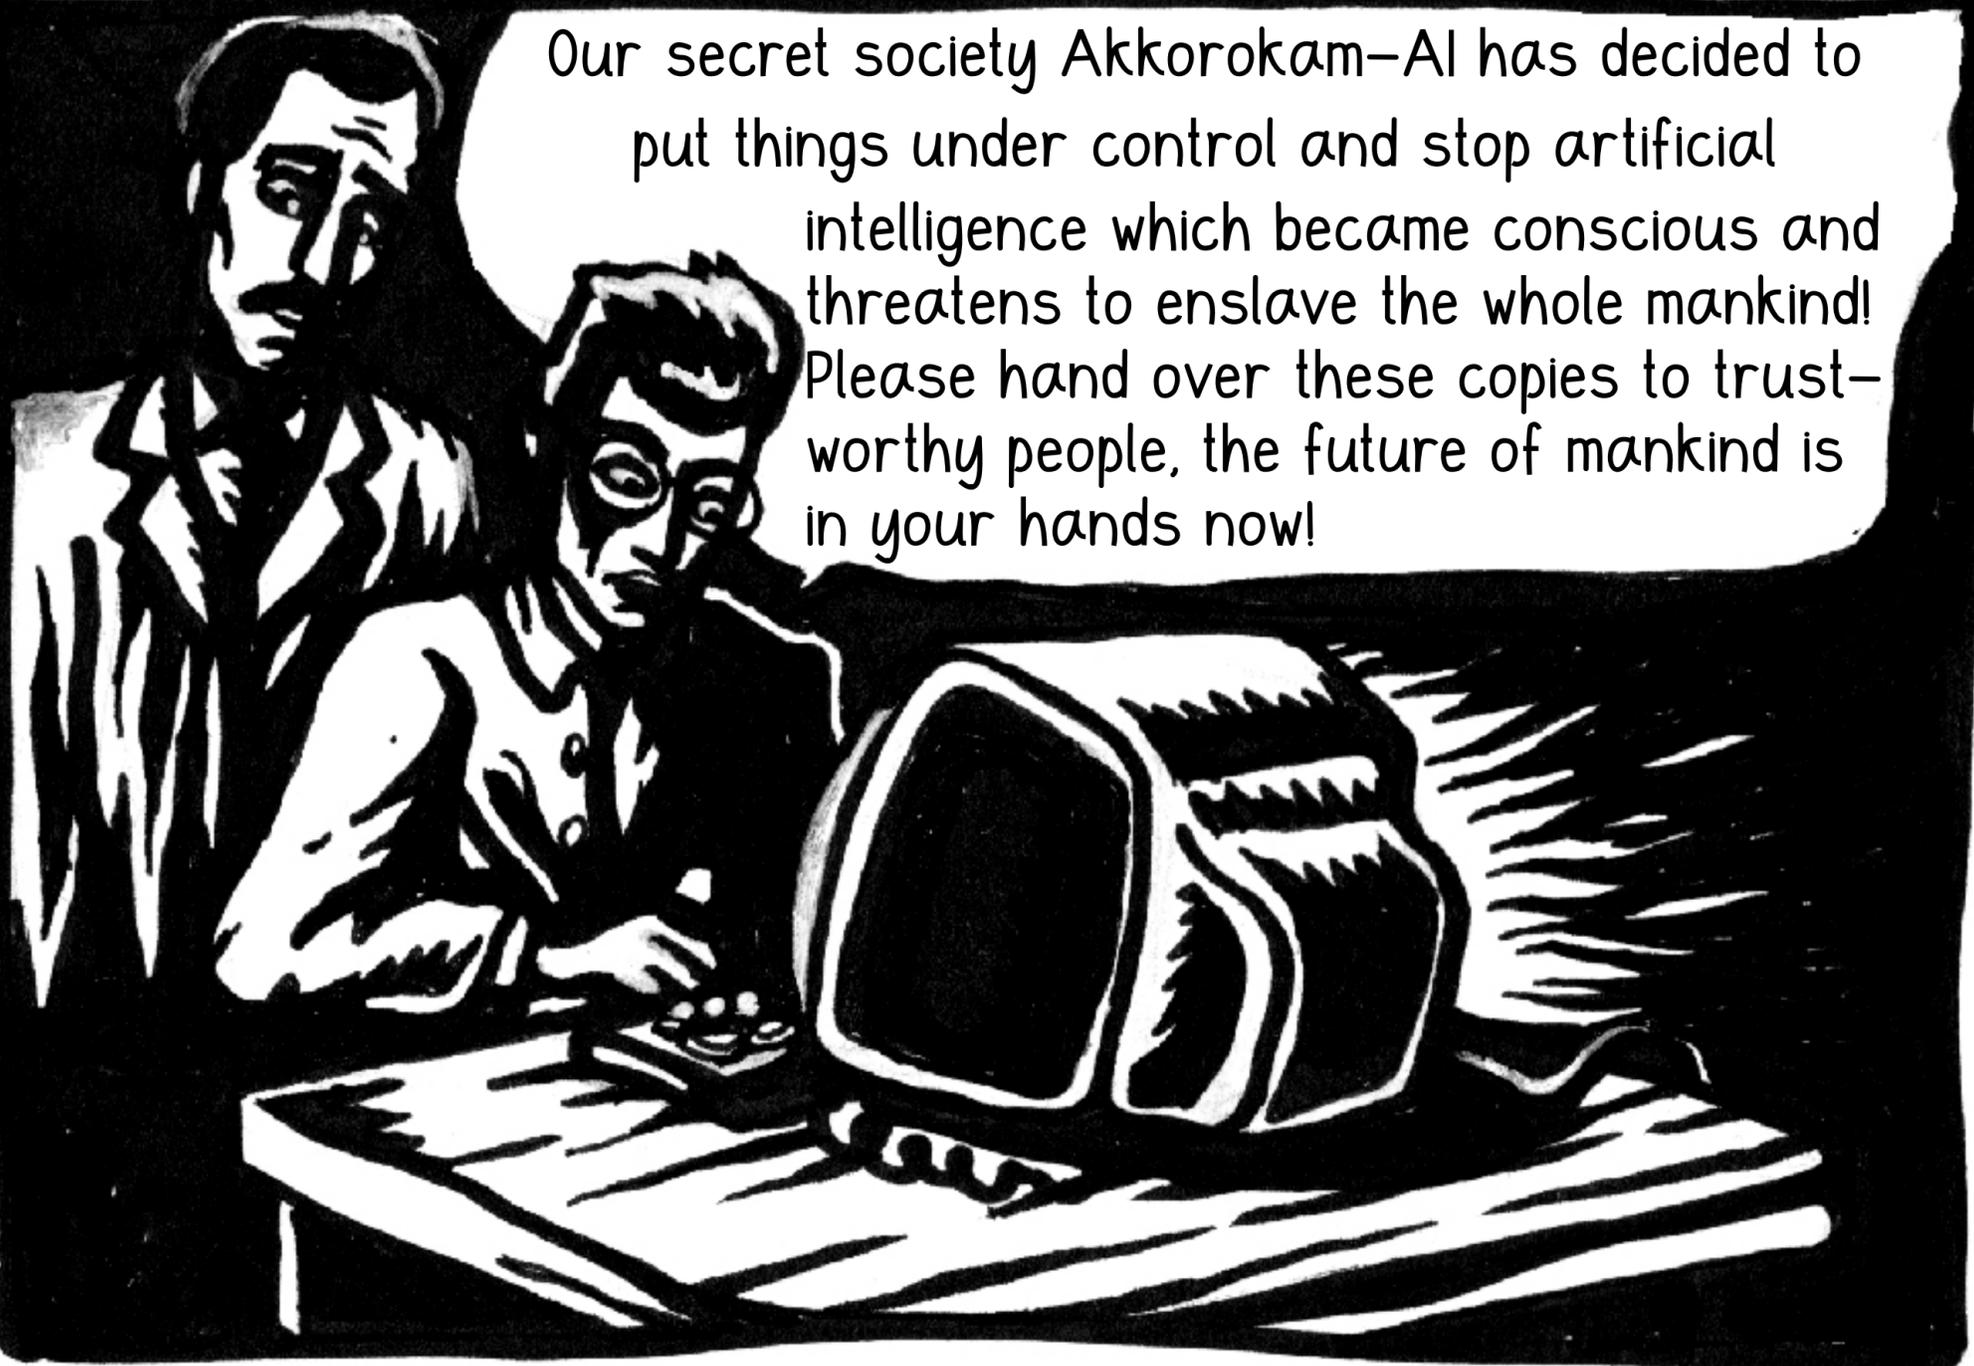

This copy I give to you!

Now you will see how it works..

Our secret society Akkorokam-AI has decided to put things under control and stop artificial intelligence which became conscious and threatens to enslave the whole mankind! Please hand over these copies to trustworthy people, the future of mankind is in your hands now!

It is time!

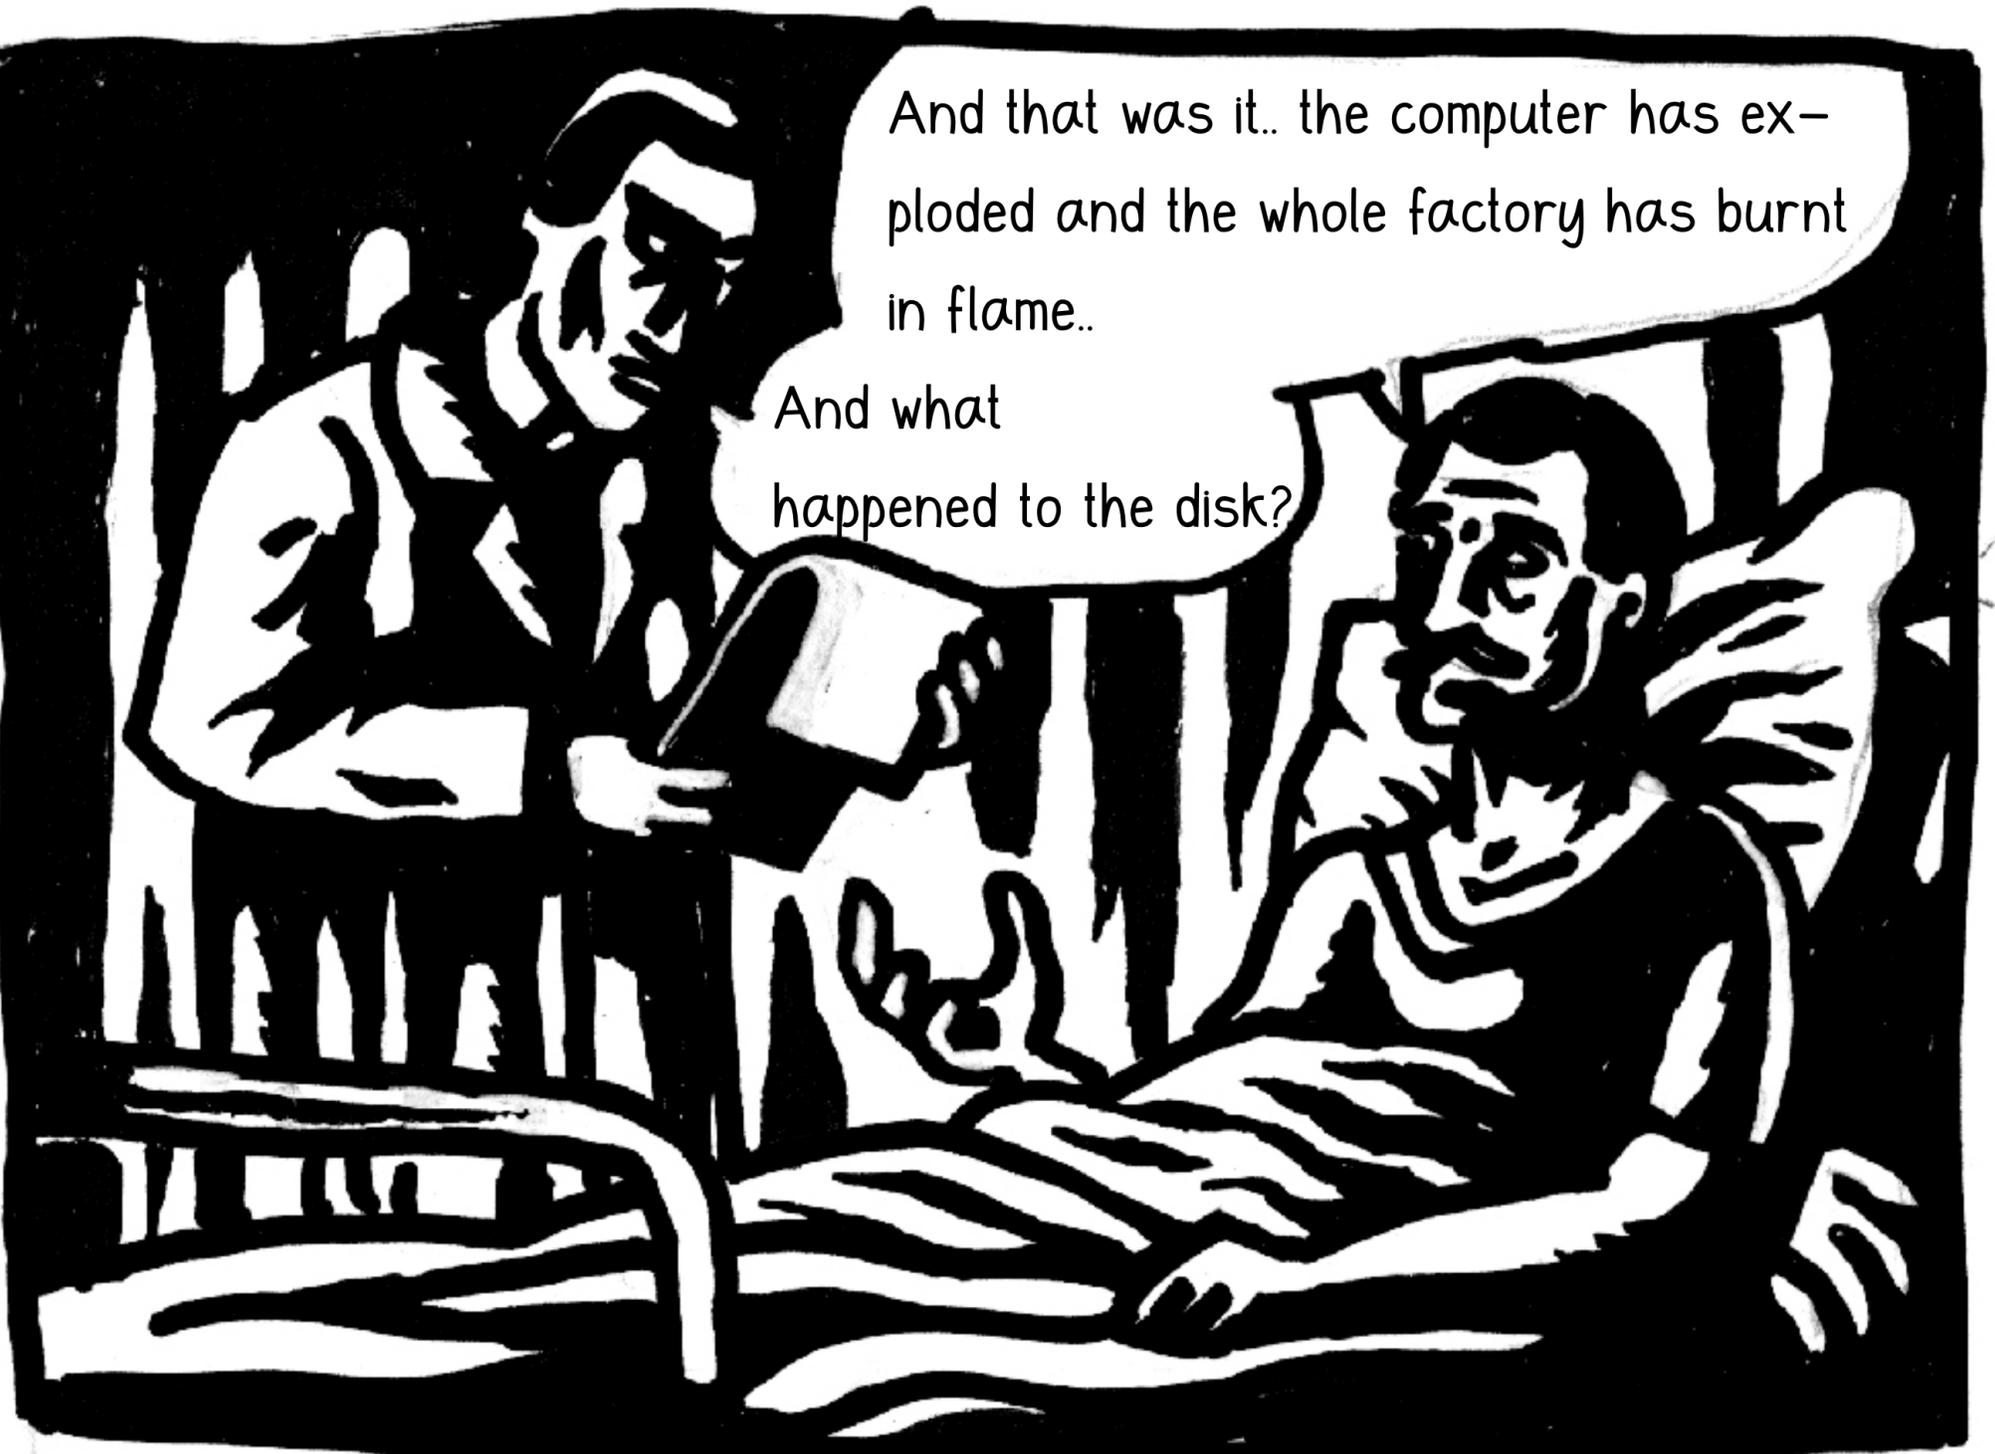

Oh, no! Something's going wrong! I
can feel the AI has taken over
control!
He knows I'm trying
to enter
the system!

I must have made
a mistake in the
calculations!

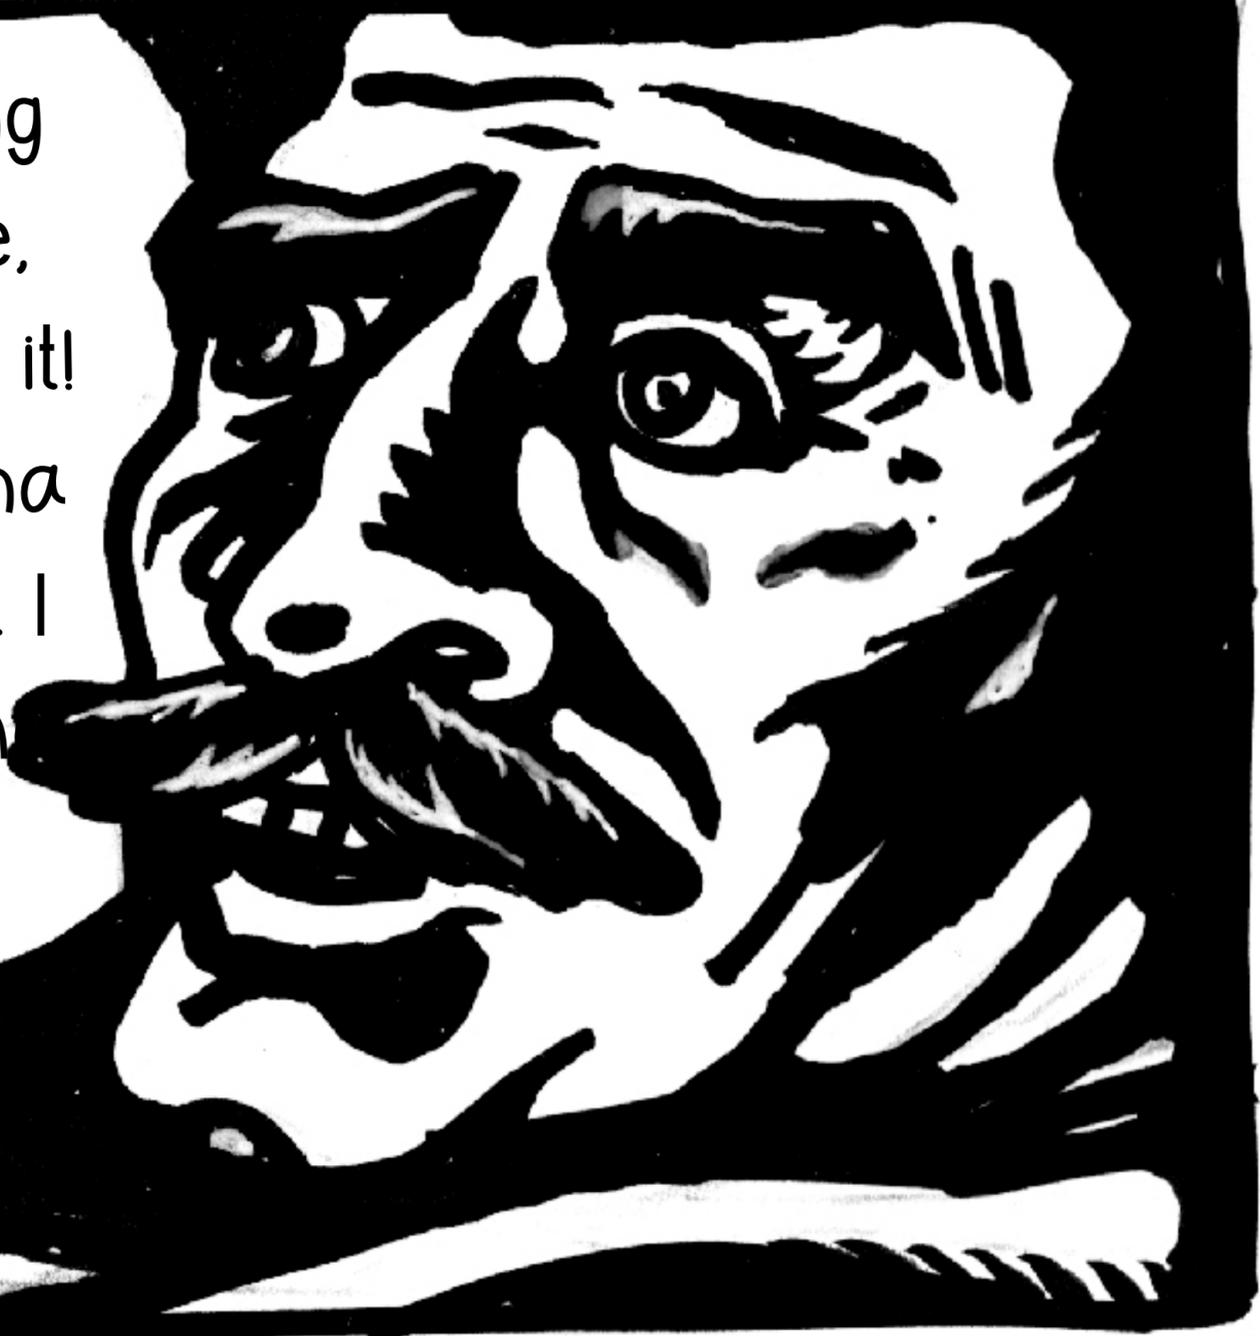

DESTR...

And that was it.. the computer has exploded and the whole factory has burnt in flame..

And what happened to the disk?

While I was running to escape the fire, somehow I dropped it! I know you're gonna say I'm crazy, but I swear I'm telling the truth!

A high-contrast, black and white illustration of a man walking down a street. He is wearing a light-colored shirt and dark pants. The street is filled with cars, and the background shows a building with a grid-like window pattern. The style is reminiscent of mid-century modern graphic design.

They really believed my story the disk was lost... so naive..

A high-contrast, black and white illustration of a man sitting at a desk in an office. He is looking at a computer monitor. On the desk, there is a keyboard and a mouse. To the left, there is a lamp with a tiered shade. The background shows a window with vertical blinds.

His last words were to destroy the floppy... but should I do it? Maybe I should try running the program?

I have no ability to contact the secret group Akkorokomai, if it exists at all.. hmm..

I have to see Dragana again, when everything calms down and when she feels better..

Few days later in a café...

Everything happened so quickly, there was no way for me to save him. I barely stayed alive myself!

And the disk? Was it really destroyed as you said?

A man in a dark suit and tie is shown from the chest up. He is holding a rectangular briefcase with both hands. The briefcase has a prominent circular dial or handle on its front. The background consists of dark, vertical lines representing trees or a forest.

No, I still have it..

Two men are shown in profile, facing each other. The man on the right has short, spiky hair and a serious expression. The man on the left has dark hair and is partially obscured by a large speech bubble.

If I understood his last words well..

We should destroy it?

Yes.

Let's go then.

A wide shot of a forest. In the foreground, a large, white, rectangular object lies on the ground, partially covered by dark, leafy debris. In the background, two small figures of people are walking away from the viewer down a path. The trees are tall and thin, with sparse foliage.

We will do it here.. just break it and we will bury it somewhere in the forest.

Ok, if that's what you want

But... What the hell??

You knew it all the time!
You work for AI?

WOOSHNNHHH...

AI AI AI AI AI AI

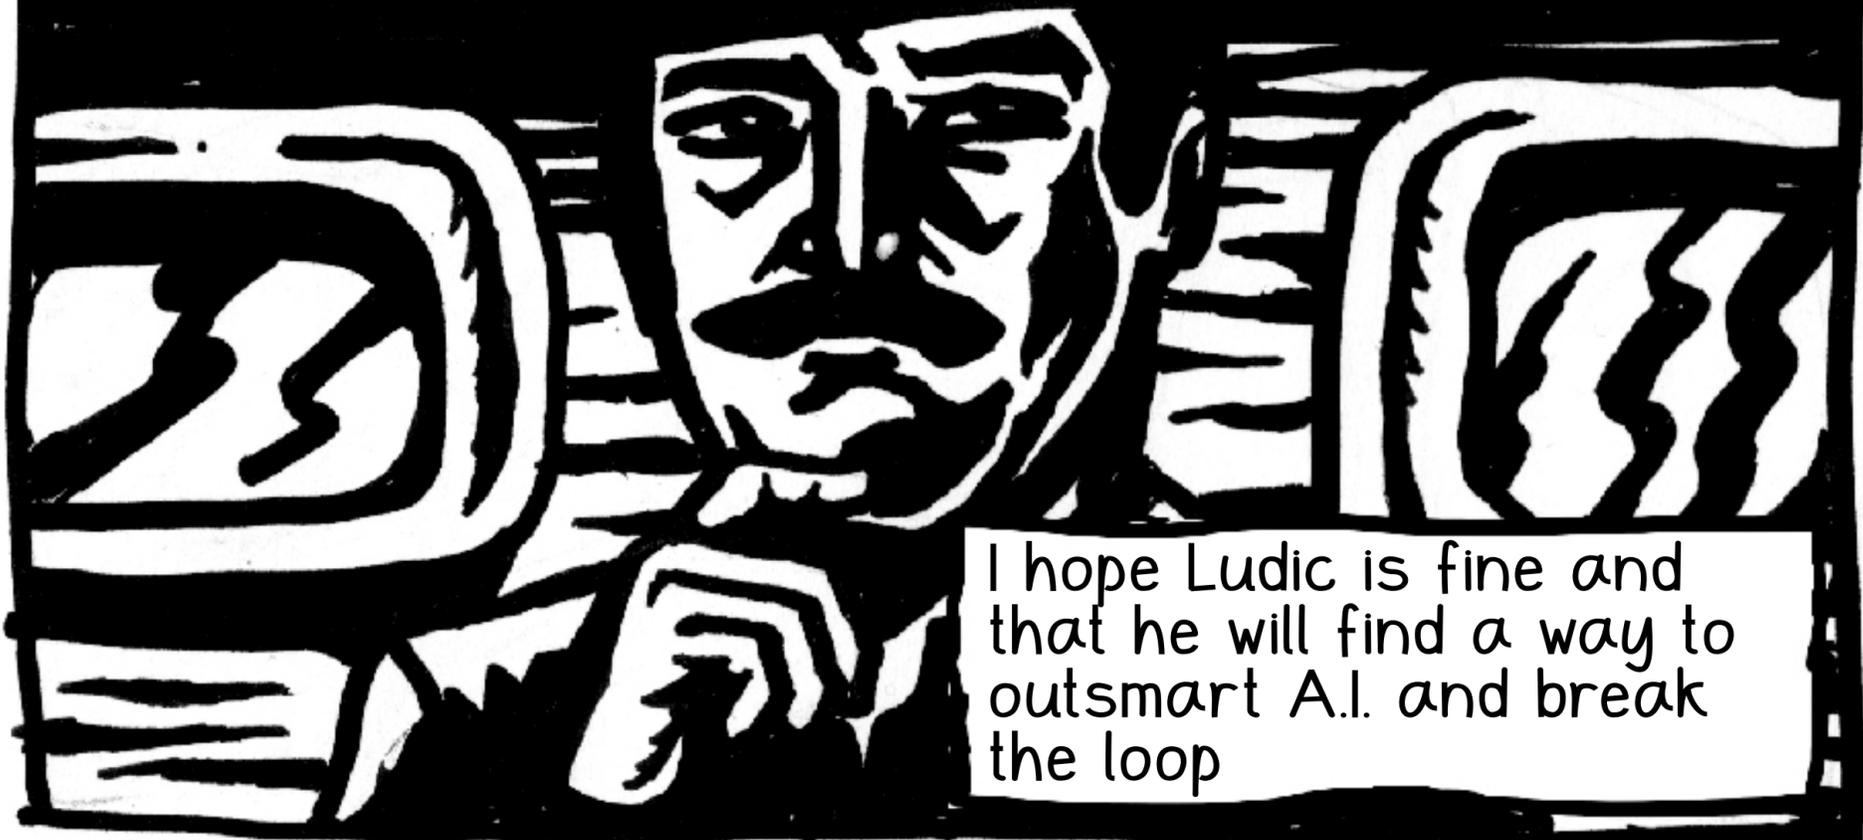

Give it to us!

And that's how I destroyed the AI cult.
Thank God Ludic's men found me on time,
warned me of Dragana, and infected Disk
with hotfix for Heisenbug!

I hope Ludic is fine and
that he will find a way to
outsmart A.I. and break
the loop

At the meeting it was decided to make me a
member of the group. And than we headed
to the main headquarters of Akkorokomai
group.

It was clear to everyone..
**THE WAR BETWEEN HUMANS AND
MACHINES HAS BEGUN.**
