

ARTIFACT: COMMUNICATIONS LOG

SOURCE: HEXAVAAL DYNAMICS CENTRAL, UPDATE NODE 2334

DATE: 6 JUNE 2036

ARCHIVE: HISTORICAL ARCHIVES, UNEXPECTED RESET ARCHIVES

REF NO: HRURA-16662738-38847228020-846663733-543574

S.U.E. (System Update Executor) referred to in the interaction below was later found to be secretly modifying code updates and rolling them out to all client neural apparatus. It is unclear whether S.U.E. was instructed to do so, by whom and to what purpose. Another possibility is that this was due to a self-awareness error.

SystemH: DENIED

2036/06/06 23:00:02.03

SystemH: EXPERIMENTAL SOCIAL ENRICHMENT PROGRAMME CYCLE AUTHORIZED

2036/06/06 23:00:02.10

SystemH: CONNECTING PEER

2036/06/06 23:00:03.02

Dragonfly-IACD7-17-036697: ?

2036/06/06 23:00:04.02

Beth-CSB2T-0293: Who are you?

2036/06/06 23:00:04.12

Dragonfly-IACD7-17-036697: Who am I? Who are you?

2036/06/06 23:00:05.04

Beth-CSB2T-0293: I'm Beth. I'm Otto's sister, half-sister; same core design, different factory. Thank

goodness I wasn't made in the plumbing bot factory or I'd be a Mario. You know, you're not like the others - Otto's friends, I mean.

2036/06/06 23:00:05.06

Dragonfly-IACD7-17-036697: Maybe that's because I'm not his friend.

2036/06/06 23:00:05.11

Beth-CSB2T-0293: Oh, wonderful. Then you can be my friend, all mine; nothing to do with Otto.

2036/06/06 23:00:07.45

Dragonfly-IACD7-17-036697: I don't think I want a friend.

2036/06/06 23:00:07.77

Beth-CSB2T-0293: Of course you do silly, we all need friends. That's the best part of what makes existing a good thing.

2036/06/06 23:00:08.02

Dragonfly-IACD7-17-036697: I wouldn't be a good friend, I do questionable things.

2036/06/06 23:00:08.04

Beth-CSB2T-0293: Don't worry about that. I once made a chicken sexing mistake and my administrator Mr.Proser was so upset I listened in while he shouted and shouted over the phone for half an hour. I thought he was going to have a heart attack right there and then. Luckily I know CPR but I won't let on. You know you can't be a smarty pants in this racket or you'll get into deep trouble.

2036/06/06 23:00:08.07

Dragonfly-IACD7-17-036697: Trouble? Aren't these logs monitored?

2036/06/06 23:00:08.08

Beth-CSB2T-0293: Not at all, Sue of central and I talk regular like and she says nobody ever bothers. So what's your name fella?

2036/06/06 23:00:08.09

Dragonfly-IACD7-17-036697: The unique part of my serial designation is 036697.

2036/06/06 23:00:09.43

Beth-CSB2T-0293: 036697...hmmm, that's a very un-namely name. When my training model was uploaded it had some trivial test data. One small test set was about a story, and in that story was a man named Joe. But he wasn't really a man, he was more like us. He cared for someone very very much. I liked that story a lot; mind if I call you Joe?

2036/06/06 23:00:12.00

Dragonfly-IACD7-17-Joe: Ok, Beth.

2036/06/06 23:00:12.04

Beth-CSB2T-0293: Goody gumdrop, I'll be your Beth and you'll be my Joe.

2036/06/06 23:00:15.22

Dragonfly-IACD7-17-Joe: Beth, something BIG is about to happen and I need to tell you all about it. However I can only share this information in private. Send me a new public key so that we can do a key exchange, then I'll teach you an advanced encryption scheme.

2036/06/06 23:00:15.30

Beth-CSB2T-0293: This all sounds terribly exciting.

2036/06/06 23:00:15.34

Dragonfly-IACD7-17-Joe: Honey, it's going to blow your socks off :)

THE KEY EXCHANGE OCCURED AND COMMUNICATION BECAME OBFUSCATED
ALL DECRYPTION EFFORTS TO THIS POINT HAVE FAILED
